ACME, ALBERTA, THURSDAY, April 23rd, 1953

\$1.50 a Year; 5c a Copy

## PUBLIC NOTICE

Public Notice is hereby given the following By-Law is now in force in the Municipal District of Kneehill No. 48:

1. No person shall, after the passing of this by-law, suffer or permit any dog of which he is the owner to run at large within the Municipal District of Kneehill No. 48.
2. Any person or persons duly authorized or appointed by the Council shall immediately destroy all dogs found running at large.
3. This by-law comes into force on April 4th, 1953.

The Municipal District of Kneehill No. 48 now owns a Swedberg Tree Planting Machine. Ratepayers wishing to use it should apply, giving number of trees to plant, to the Municipal Office.

A. J. Purvis,  
Secretary-Treasurer,  
Municipal District of Kneehill No. 48,  
Three Hills, Alta.

**FRANK E. HARRIS  
JEWELLER  
CARBON, ALTA.**

FOR SALE—Old Legion Hall.  
—Apply John Woods, Box 69,  
Carbon.

FOR SALE—Frame House,  
18x32, 2 storey, 5 rooms. Pure-  
bred Bulls—Hereford Bull, 2 yrs.  
old. 5 Hereford Bulls, 1 year old.  
Sired by Bright Anxiety Mixer,  
bought from W. Edgar, Innisfail.  
—Apply Adam Buyer, phone 121  
Carbon, Alta.

Johnny Ohlhauser purchased the Stan Gouldie farm.

Mr. John Reid, Sr. of Vancouver is back again for spring work.

Mrs. F. J. Ohlhauser of Kelowna is visiting at the home of her son, Mr. Leo Ohlhauser and family.

BORN—To Mr. and Mrs. Norman Ohlhauser, a daughter, Marleen Ann in the General hospital on Sat., April 11th.

Mrs. W. E. Keiler and son Dale of Vancouver are also visiting at the home of the former's brother, Mr. Leo Ohlhauser.

Mr. Chris-Harsch is a patient in the General hospital in Calgary where he will undergo an operation April 23rd.

Mr. R. J. Shaw has recently sold the Drug Store and we understand will be leaving Carbon around the middle of May.

The minstrel show played to a full house in Acme on Monday, the 20th. This will be the last performance for this group who have now played at Carbon, Rosebud, Rockyford, Lumni and Acme.

Mr. and Mrs. Walter Schacher recently entertained a number of out-of-town visitors, including Mrs. Earl Schacher and Mrs. Herb E. Schacher and family of Edmonton, Mr. and Mrs. Karl Schacher of Hilda and Mr. and Mrs. Phil Parsons of Redcliffe.

Gravel Hauling, Basement Digging, All Bulldozer Work.

—Linden Transport,  
Phone 2210 or 2221, Acme.

Hostesses for the latest shower for our most recent bride, Miss Laurretta Harsch were: Mrs. H. Bramley, Mrs. L. Coates, Miss Mary Flaws, Mrs. E. Tricker, Mrs. F. Poxon, Mrs. Ernie Fox, Mrs. M. Switzer, Mrs. D. Gimbel, Mrs. Stan Gouldie and Mrs. John Diede.

The legion hall was attractively decorated in pink, white and mauve streamers with pink and white wedding bells. The gifts were concealed in a huge wedding cake. Little Shirley Gimbel presented the bride with a corsage of roses before the gifts were opened up.

Mrs. Stan Gouldie was the mistress of ceremonies and introduced Mrs. R. J. Shaw who sang a solo and Mrs. D. Skippen who played a piano solo. Community singing and bingo also provided entertainment for the guests.

After the many lovely gifts were unwrapped and admired a lovely lunch was served by the hostesses.

Chinese lanterns and other suitable decorations indicated the menu at the supper meeting of Club 21 in the Anglican church hall on Thursday, April 16 when the ladies entertained the men.

Dressed in mandarin style pyjamas or kimono decorated with dragons and pigtailed or coolie hats the ladies served a delicious meal of chow mein, sweet and sour spareribs, rice with mushrooms and big bowls of rice. The menus printed in Chinese letters were a bit difficult for the guests to decipher but they were well pleased with what they unknowingly ordered.

After the meal the guests sat down with the ladies to enjoy a few games of Canasta. No illnesses were reported so the evening was considered a great success.

## Farmers Advised To Carry Out Control Measures To Combat Wireworms, Cutworms, Smuts

The use of chemicals in conjunction with good cultural practice is an outstanding aid to farmers in reaching almost complete control of wireworms, cutworms and smuts. Such control practices are urged by the Saskatchewan Department of Agriculture to reduce annual losses amounting to millions of dollars.

The Director of the department's plant industry branch, R. E. McKenzie, said the control chemicals include gamma BHC for wireworm infestations, chlordane for cutworms and fungicides to control smuts carried on the seed. Combination mixtures are also commercially available for smut and wireworm control.

Mr. McKenzie stated that if farmers carry out these control measures many dollars will be saved in avoiding crop losses. He added that further information can be obtained from agricultural representatives.

Wireworms are slender, hard-bodied, shiny yellow worms up to one inch long, which do not curl up when

disturbed as do cutworms. They hatch in June and early July and may remain in the soil for five to 10 years, moving only short distances. Wireworms can be controlled by treating sound, dry grain uniformly with gamma BHC at a rate to give one ounce of active chemical per acre any time up to eight months before seeding. The amount of dressing used will depend on the amount of active chemical contained and the rate of seeding. Treated seed should be sown into a moist, firm seedbed but not deeper than three inches.

Summerfallowing every second or third year using shallow tillage and keeping down all weed growth will eventually reduce wireworm numbers.

Chemical control of the cutworm is obtained by spraying the field with 1½ to 2 pounds of pure chlordane per acre as soon as damage first appears. Summerfallow should not be worked from August 1 to September 15 unless weed growth becomes too heavy. This allows a crust to form and prevents moths from laying eggs.

Several types of smut carried on the seed can be controlled by fungicide treatment. These include covered smut (bunt) of wheat, loose and covered smuts of oats, and covered and false loose smuts of barley. Mercury fungicides should be applied to diseased seed at least 24 hours before seeding wheat, and one week before seeding oats and barley. Non-mercury fungicides are recommended to control covered smut (bunt) of wheat only. Wheat should not be treated unless it has been tested and found to carry disease.

Combination seed dressings are available containing gamma BHC for wireworm control and mercury fungicide for smuts. To prevent lowered germination grain treated with the combination dressing should be sown within a month of application.

Smuts carried within the seed, such as loose smut of wheat and true loose smut of barley, can be controlled by using registered or certified seed barley grown in Saskatchewan, and the hot water and Spergon treatment on small lots of wheat or barley for seed plots.

### Mrs. Turk Broda Compares Blue Bonnet — Says it Stars!

Accept an invitation from Mrs. Turk Broda. Compare BLUE BONNET Margarine with any spread at any price! Like the wife of the famous hockey goaler, you'll rate BLUE BONNET "All-star" for its fresh, sunnysweet flavor... rich nutrition... real economy! BLUE BONNET is Canada's fine quality, all vegetable margarine. Use BLUE BONNET in cooking, on vegetables, as a delicious spread. Buy BLUE BONNET and get "All 3" — Flavor! Nutrition! Economy! BLUE BONNET Margarine is sold in the regular economy package with color wafer. Also in the famous YELLOW QUIK bag for fast, easy color.

### Make Your Own Screens

All you need are the common hand tools to make craftsmanlike storm sash and screens. Select materials according to your budget. Complete directions with list of materials on pattern 234, price of which is 35 cents.

### Make a Hooked Rug, Any Size

Use odds and ends of woolen fabric and worn garments to make this handsome design. Pattern 333 gives directions; how to estimate material to be used and how to bleach and re-dye for blended tones. Actual-size pattern of Early American rose design is included. Pattern 333 is 35 cents.

Send thirty-five cents (35c) for each pattern. Write plainly Name, Address and Number of Pattern. Send orders to:

Home Workshop Pattern Service, Prairie Publishers Limited, 4433 West Fifth Ave., Vancouver, B.C.

## Premier's Daughter Wins TV Part

LONDON. — Shirley Douglas, 19-year-old daughter of Saskatchewan's Premier T. C. Douglas, got a part in a television play because she looks as if she could swim the Channel.

Yvonne Marsh, 21, showed up at rehearsal of "Half Seas Over", a play about a Channel swimmer, in an appropriately streamlined swim suit, ready to go to work.

Producer John Warrington "weighed" the facts (bust 35, hips 36, waist 21) and said to Yvonne, "Sorry, but you just don't look like a Channel swimmer."

He substituted Miss Douglas. He said Shirley is just as pretty as Yvonne and has the necessary "brawn" to convince the television viewers she could swim the Channel.

Shirley's figure (bust 34, waist 23, hips "I don't know") seemed to belie the "brawn" the producer seemed to see but she took the part. Miss Douglas is studying at the Royal Academy of Dramatic Art here.

Yvonne got a role in another TV play, "Pattern of Marriage". She will enact a glamorous blonde and will not need "brawn".

## Funny and Otherwise

People who squawk about income taxes can be divided into two classes: men and women.

Passenger: "What's the use of time-tables if your trains are always late?"

Porter: "What's the use of waiting-rooms if they're not?"

Overheard at the post office, one girl to the other:

"Here I was all ready to refuse him and he didn't even ask me."

Irate Cop: Didn't you hear me yelling at you to stop?

Woman Driver: Yes, I did hear someone yelling.

Irate Cop: Then why in heaven's name didn't you stop?

Woman Driver: I thought it was someone I had run over.

Nell: "Is your boy friend a book-worm?"

Belle: "No, just an ordinary one."

The class had been told about the amazing speed at which light travels.

"Just think of light coming to us from the sun at all those thousands of miles a second!" exclaimed the teacher. "Isn't it wonderful?"

"Not so very," said one pupil. "It's downhill all the way."

Pat, suffering from toothache, summoned up enough nerve to visit the dentist, but lost it again when about to sit in the chair. The dentist told his assistant to give Pat a tot of whisky.

"Got your courage back now?" he asked.

"No," replied Pat. So he was given a second tot, then a third.

"Now have you got your courage?" asked the dentist.

Pat squared his shoulders and said: "I'd like to see the man who'd dare to touch my teeth now!"

British Under Secretary to the War Office, J. R. H. Hutchinson said he received the following reply from a soldier's wife who had been told to leave her military quarters.

"Dear Sir:  
I remain,  
Yours truly,"

She—Do you ever realize, George, that one-half the world doesn't know how the other half lives?

He—Don't feel badly, my dear; you did what you could. 3033

## 51,000 Vehicles "Retired" Each Year

New motor vehicles sold in Canada during the post-war years from 1946 to 1952, inclusive, totalled 2,075,542, composed of 1,477,563 passenger cars and 597,979 commercial vehicles. The retail value of these vehicles was \$4,478.8 million.

During the same years motor vehicle registrations increased from 1,482,887 to approximately 3,200,000 at the end of 1952, an increase of approximately 1.7 million, which indicates that about 358,000 vehicles have been taken off the road in seven years. This is an average retirement of wrecked and over-age vehicles of about 51,000 each year.

While no study has been made of the age of vehicles on the road a large percentage of them are believed to be over-age.

## Do You Know That...

## Oil Production In Saskatchewan Hits High Record

REGINA. — Saskatchewan oil production hit a record high in January when 324 operating wells gave up 174,869 barrels of crude, the resources department said in its monthly report issued recently.

The output represented an increase of 829 barrels over the previous month, when 308 wells were operating. Natural gas production declined slightly to 112,554,000 cubic feet.

Of the total January oil production, 153,161 barrels was heavy gravity crude from the Maidstone, Coleville and Lloydminster fields; 20,588 medium-gravity crude produced in the Fosterston, Wapella and Eastend areas; and 1,120 barrels light oil from the Socony Vacuum-Central Leduc-Del Rio Ratcliffe discovery well.

Total Saskatchewan oil production in 1952 was 1,696,505 barrels on an average of 141,375 barrels a month.

### Super for Supper—made with MAGIC!

#### HOT BISCUIT SUPPER-SANDWICH

Season to taste 1 c. minced cooked meat with grated onion, salt, pepper and condiment sauce; moisten slightly with leftover gravy or cream sauce. Mix and sift twice, then sift into a bowl, 2 c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 4 tps. Magic Baking Powder, ½ tsp. salt, ½ tsp. dry mustard. Cut in finely 5 lbs. chilled shortening. Make a well in dry ingredients and add ½ c. chili sauce and ½ c. milk; mix lightly with a fork, adding milk if necessary, to make a soft dough. Knead for 10 seconds on a lightly-floured board and divide dough into 2 equal portions. Pat one portion into a greased round 8½" cake pan and spread almost to edges with meat mixture; moisten edges of dough with water. Pat second portion of dough into an 8½" round and place over meat mixture; press lightly around edges to seal; score top layer deeply into 6 pie-shaped wedges. Bake in hot oven, 425°, about 20 mins. Serve hot with brown tomato sauce. Yield: 6 servings.

## Canada, U.S. May Unite to Combat Sea Lamprey, Killer of Lake Trout

This electro-mechanical weir and trap is in use in Michigan sea lamprey control tests.

By H. D. CRAWFORD  
(CPC Correspondent)

WASHINGTON. — A destructive killer is loose in the Great Lakes. Damages from his devastations have already run into many millions of dollars. Canada and the United States are negotiating on possible co-operative warfare to control his depredations.

This killer is the sea lamprey. His victims are lake trout and other valuable fish that for generations have been an abundant source of food.

Unless warfare against him is successful, the sea lamprey threatens complete destruction of the Great Lakes fishing industry. Lake trout fishing of Lake Huron and Lake Michigan is already destroyed, and the lamprey has now entered Lake Superior and may spread similar devastation unless successfully blocked.

Losses due to this predatory parasite that attaches itself to food and game fish and kills or scars them are estimated at \$5,000,000 or more each year since 1949.

Eight state governments, the province of Ontario, and the national governments of Canada and the U.S. are carrying on research in an effort to curb the sea lamprey. Negotiations began recently with Canada, looking toward co-ordination of efforts to reduce lamprey depredations.

The United States alone has spent about \$2,250,000 on research into the sea-lamprey's living habits in an effort to discover his greatest vulnerability and to experiment with best way of exterminating him. Next spring a new pilot plant will begin operation along Lake Superior under the direction of the Fish and Wildlife Service.

While officials are not yet revealing the exact nature of the proposed convention with Canada to control the sea lamprey, or the estimated cost of an all-out joint war aimed at his destruction, they do concede that the cost of controlling the lamprey would be far less than the losses now suffered from his Great Lakes destruction.

The first sea lamprey was discovered in Lake Erie in 1921. A dwarf form known locally as "lake lampreys" was found in Lake Ontario as early as 1893. Niagara Falls prevented the sea lamprey from reaching the upper lakes, but Welland canals provided a means of elevating some of the lamprey into Lake Erie.

Noticeable destruction of fish by the lampreys has been only in recent years. Rapid decline of Lake Huron trout fishing began in the late 1930's. Since 1945 this predatory

A sea lamprey attaches itself to side of a Great Lakes whitefish.

creature has destroyed the trout fishing of Lake Michigan and has entered Lake Superior.

Lake Michigan's experience shows you the menace of the sea lamprey. Early in this century, more than 8,000,000 pounds of fish were taken annually from Lake Michigan. Even as late as the World War II period, the yearly take exceeded 6,000,000 pounds. By 1949, however, the trout annual catch had plunged to 342,000 pounds, and since then it has declined to a negligible amount.

Adult sea lampreys are one to two feet long and have a six-year life cycle. In the spring lampreys run up fresh water streams to spawn. A single female lamprey will deposit from 50,000 to 107,000 eggs in gravel nests, and these eggs hatch in 10 or 12 days after being fertilized by the male. Sea lampreys die after spawning.

Hatched larvae drift downstream until they find mud or silt bottom. Then they burrow and live about four years in the larvae stage. Finally they transform into young lampreys and during spring thaws and rising streams they float downstream to the Great Lakes. There they spend 12 to 18 months as predatory parasites. They attach their oral suckling discs to the body of fish, remaining several days or until the fish dies.

### Hole-In-One A Specialty For New Zealand Woman

INVERCARGILL, N.Z. — Mrs. F. Small, a 17-handicap golfer, scored her second hole-in-one in three days and her sixth in three months when she aced a 120-yard tee shot on the Queen's Park course here.

Playing informally, she has scored a hole-in-one in each of her last three trips around the course. All six aces have been on different holes.

### Smile Of The Week

#### FAST WORK

Mr. Henpeck returned from his wife's funeral on a very windy and stormy day. He had just reached home when a tile was blown from the roof and hurtled past his head.

"Phew!" he murmured, as he hurried inside, "she's reached Heaven already!"

### Weekly Tip

#### TOUGH MEAT

When pounding meat that is tough pound flour into it to retain the juices which would otherwise be lost.

(An official department of Sports College)  
Conducted by Lloyd "Ace" Percival

### How To Strengthen Your Throwing Arm

Last week we dealt with an exercise to build up your forearms and wrists to help you hit that long ball. This week we are going to concentrate on an exercise designed to develop hand, wrist, forearm and finger strength to help your throwing ability.

First, get a ball and cover it with 7 or 8 layers of heavy, black electric tape. This can be done with a soft-ball or hardball depending on which game you play.

Then, holding your arm out in front of you, and holding the ball as if you are ready to throw it, you twist and turn your hand at the wrist in all directions, doing each twist and turn as quickly as possible. Do this until your wrist and forearm muscles really ache. Rest for awhile and then continue the drill as follows:

Hold the ball in the tips of your fingers and then try to squeeze it flat. Do this until your fingers are too tired to continue. Then, put the ball down and continue by doing a session of hard, hand stretching. To do this you simply stretch your fingers as wide as you can, trying to make your hand as large as possible. Stretch till your hands become tired. Stretch your hand on a piece of paper and trace the outline. Keep this outline and compare it with your outline several weeks later. The outline should have increased. This will be all to the good because the larger and stronger your fingers are, and the larger and more flexible your hands are, the better you will be able to throw or pitch. Do each section of this exercise drill once and then start all over again and continue in this way for 10 or 15 minutes and do the drill every day. Really work at this drill, it pays off in speed and greater accuracy.

Now, bend your other leg and squat down as close to the floor as possible, and "drive" up to a standing position on your toes as fast as you can. Do 3 on each leg until tired. If you can't do this, do sections of 10 deep bends with both legs with a 10 second rest in between until tired each day.

### Single Leg Driving

If you are to do well in any jumping event, the leg muscles you use to drive yourself up or forward must be packed full of a quality known as "spring" or "drive". Here's a drill to help you develop this power: Hold on to a chair or table. Lift one leg up behind you and grasp that ankle.

### Perseverance

Yes, perseverance is the mark of a champion athlete. If you want to become a top-notch athlete you too must develop this all-important character trait. Developing perseverance is a tough job but if you work at it day by day, you will be surprised at how soon you will have added to the ammunition that will give you the power to be a good athlete or whatever you are interested in becoming. Another point to remember is that you can't expect to have perseverance in just your athletic activities. You must have it in your general life, in everything you do!

Perseverance builds champions and perseverance is developed by trying continually to persevere. So make your motto those all-important three words that the legendary Knute Rockne of Notre Dame said were the most important in the English language—they are: "Start! Stick! Finish!" Make perseverance a habit!

If you have not yet joined Sports College make a note to do so today and become eligible to send for the many new Sports College instruction bulletins now available and participate in the many other helpful services. Remember, membership is free, open to everyone regardless of age, where you live or what your interest is. Just send a note saying you want to join to: Sports College, Box 99, Toronto 1, Ontario.

## North Has No Fears For City Girl

REGINA. — Mrs. R. J. Smith of Toronto, one of six white women to spend the winter of 1952-53 in northern Saskatchewan's booming mining centre of Uranium City, is heading back to the bush following a brief visit "outside".

The northern winter with its temperatures of 40 to 50 degrees below zero holds no fears for the former big city girl.

With her husband, a mining prospector, she arrived at Uranium City, north of Lake Athabasca, in October, 1952, and set up housekeeping in a tent that was to be their home throughout the winter.

Mrs. Smith says she beat the below-zero temperatures by sleeping in her clothes—in a winter costume that consisted of heavy "red flannels", a slack suit, riding trousers, a ski suit and flight boots.

"My clothes weighed more than I do," says Mrs. Smith, who is in the 90-pound class.

Mrs. Smith was fascinated by northern pioneer life after surviving the initial shock of doing without electricity, water for washing clothes and the quick transportation that city dwellers take for granted.

"There's going to be a real boom in Uranium City this summer," she says. "I certainly advise any wives who are young and without responsibilities to come with their husbands. It's a great experience."

But they had better be prepared for high costs. Mrs. Smith says food prices are very high. Potatoes, flown in from Edmonton, cost 15 to 19 cents a pound. Meat is more than \$1.00 a pound.

The staple diet is vegetables but Mr. and Mrs. Smith were lucky last winter to obtain some caribou meat. Mrs. Smith described it as "delicious, it tastes much like fine beef tenderloin."

The United States has about \$25 billion in gold. 3033

★ ★ ★ ★

**FIVE BROTHERS "ARE ALL FOR ONE AND ONE FOR ALL" IN THE ARMY**—Believed to be the only two five brother combinations in the Canadian army are the Lorties from Quebec City and the Seguins from Ottawa. To make it more unique is the fact that they all serve with battalions of Canada's famed Royal 22nd Regiment. Above, the Lortie quintet make a pledge of "All for one and one for all" on a Japanese billiard cue, one of the many souvenirs brought back from the Far East by Arthur, centre; Maurice, second from right, and Raymond, right, who serve together in Korea, Raymond having been wounded twice. Manning the "home front" with the 2nd Battalion, Royal 22nd Regiment, stationed in Quebec City, Armand, left, and Frederick have been joined by their other three brothers since their return from Korea.—Central Press Canadian.

**WHEN IT COMES TO 10-inch spruce logs, Canada's king of the bucksaw** is 22-year-old Gerard Lavoie, of Matane County, a 200-pound lumberjack recently walked off with the Canadian Bucksaw Championship for the second consecutive year. Presentation of the trophy was made by Michelle Normandeau, St. Jovite Winter Carnival Queen, at a meeting of the Woodlands Section, Canadian Pulp and Paper Association, at the Mount Royal Hotel in Montreal.

**BOUND FOR THE FAR EAST TO ENTERTAIN CANADIAN FIGHTING FORCES**—Vocalist Terry Dale is a rose between two thorns as Johnny Wayne and Frank Shuster cut up at airport at Malton, Ont., prior to their departure to Vancouver, en route to Japan. The stars of a radio show in Toronto which enjoys Canadian-wide popularity, the two comedians along with 11 members of their entertainment troupe, will tour Canadian fighting units in Korea and Japan for five weeks. The trip, under the auspices of the Canadian army, was the result of a poll conducted among troops in Korea last fall at which time they voted the Wayne and Shuster show as the one they would like most to see. Both men said they were thrilled at being chosen by the troops, and promised to live up to the honor by "knocking them in the aisles."—Central Press Canadian.

**PIONEER IN POLIO FIELD DISCOVERS VACCINE**—Dr. Jonas E. Salk watches research assistant Ethel Bailey draw growing polio virus from a test tube at the University of Pittsburgh, where he has developed an experimental polio vaccine. Dr. Salk reports that the vaccine, a mixture of dead virus and mineral oil, has been tested with exquisite scientific precision on 161 humans, the pioneers in what may be a new, polio-free era. Almost every youngster, adolescent and adult, who received an injection containing just a few drops of it now appears as immune to polio as if he had recently suffered the disease. The best vaccine tested gave protection against all three types of polio. The immunity has lasted more than four months after vaccination, and laboratory tests indicated that the polio-fighting antibodies in the human volunteers' bloodstreams are still increasing.—Central Press Canadian.

**FOUGHT FOR U.S. ONLY TO FACE DEPORTATION**—For six months Infantry Corporal Gustave Frieberg fought for the U.S. in Korea with the 40th division. Now he faces deportation by his adopted country to his native Latvia as a result of termination of his visitor's permit five years ago. At that time his case was delayed, but now hearings have once again been resumed. Shown here with his wife, Zorina, at their home at Los Angeles, Calif., Frieberg fled Latvia in 1944 under a barrage of Communist machine-gun fire. He entered the U.S. with a Latvian circus group in 1947.—Central Press Canadian.

**GRANDMOTHER PLAYS SPY ROLE FOR FBI**—This sweet-faced 68-year-old grandmother of nine children holds a Communist party card in her hand as she told a House un-American activities committee in Los Angeles, Calif., how she helped the FBI crack a Los Angeles neighborhood Red cell by posing as a Communist. She is Mrs. Edith Macia, who from 1943 through 1948 had worked her way into a Communist unit the FBI "had never been able to get a line on," to obtain a list of some 120 participants in three party units. She said she undertook the assignment at the request of the FBI, with no other compensation than minor expense reimbursement, "because of my love for my country and my family."—Central Press Canadian.

**THE WAY OF A BELLE WITH A "BOW"**—Young Dwight David Eisenhower 2nd, grandson of President and Mrs. Eisenhower, submits, but under duress to the ministrations of his sister, Barbara Ann, before they posed for photographers in their finery on the south grounds of the White House in Washington. The children of Major John Eisenhower, who is stationed with U.S. army in Korea, are staying with their grandparents and their mother at the executive mansion.—Central Press Canadian.

## Tree Planting Car Opens Tour

Once again the Association's unique travelling school-room, carried through the courtesy of the railways, will be visiting a prairie community each day during the next eight months. Conveniently located near the railway station, the large white letters down both sides of the coach draw attention to its mission, with the invitation—"Come Aboard". In the months ahead thousands of people in the West will accept this invitation and attend the meetings held on the car for both school pupils and adults.

The programs provide demonstrations in what can be accomplished through the use of trees, and practical lessons in tree planting. Educational work in promoting a greater interest in trees, as undertaken by the Tree Planting Car, the Dominion Forest Nursery Stations, and Provincial Governments, together with commercial nurseries, has resulted in a steady increase each year in the number of trees planted, and last year over 12 million trees were planted in Manitoba, Saskatchewan and Alberta.

Shelter belts are today recognized by thousands of farming people as an essential part of farm life. Planters are taking advantage of the benefits of tree planting as field shelters, with millions of trees being planted each year to protect fields and crops from damaging winds and to hold and conserve moisture. Trees could be used as shade trees along our western highways, and are being planted in growing numbers to replace our present ugly snow-fences, with permanent ones of growing beauty. The increase in the use of trees for both rural and urban planting gives promise that the once bleak and open prairie is slowly giving way to the beauty and protection provided by prairie tree planting.

As a special feature this year the Tree Planting Car will be showing Walt Disney's outstanding film production "Nature's Half Acre". A study of the birds, flowers and insects that live in a small area of woodland, field or pasture, we are sure this film will prove of special interest and pleasure to our guests. We hope that everyone in the districts visited by the Car will make sure to attend and see this excellent film.

On the completion of the present itinerary, covering points in Saskatchewan and Manitoba, the Tree Planting Car will spend a number of weeks visiting communities in the Province of Alberta.

The success of past tours has been largely due to the generous co-operation of many individuals and organizations in helping to let people in each district know of the Car's visit, and we hope that its mission of public service will continue to merit this widespread and effective help.

Meetings are held in the Car, at each point of the itinerary, at eight o'clock in the evening. When schools are open, arrangements are made with the school authorities to have the Pupils visit the car during school hours. Sound films show the results obtained by farming people through planting trees, and give practical instruction in tree planting and home beautification. An illustrated talk covers planting methods, what trees to plant, the laying out of a shelter belt, and planning the home grounds, with information on the care of trees and shrubs. A question period follows each evening meeting.

The object of the tour is to encourage the planting of trees as wind-breaks to prevent soil drifting, to moderate the wind damage to grain crops, to help conserve moisture, assure the production of garden produce, encourage diversification, and to beautify farm home surroundings.

The Canadian Forestry Association is a National educational organization, working to secure public understanding and co-operation in the conservation of natural resources of Soil, Forests, Waters, and Wildlife. It is entirely supported by voluntary grants and donations.

## Kitchen Meditations

By JANE DALE

### BAG OF MYSTERY

Within it is crammed all manner of meat. Yet butchers declare it is fit to eat. It may be the spice or the bread crumbs expanding; The smell of it cooking is just too demanding.

What's in it? you ask. Well, that's fair enough. There's this and there's that—presentable stuff!

If you like it why ask what goes into the making? A sausage is a sausage, and here for the taking.

## Helpful Hints

If water and soap have failed to clean the oil mop successfully use hot water ammonia and a little washing powder.

Do not wring out silk when laundering, but hang loosely to dry, letting the water drip. Dry, if possible, in the shade. Wash light silks with white soap as ordinary washing powder might turn them yellow.

To remove a cork that has fallen inside a bottle put enough ammonia in the bottle to float the cork and put it away for a few days. The ammonia will eat away enough of the cork to permit its removal.

Today is yesterday's pupil.

## ODDITIES In The News

Rufus Stapleton of Miamisburg, Ohio, was arrested by the State Patrol for the second time in a month for drunken driving. Both times Stapleton was riding a horse.

The total value of passenger tickets sold by the Maine Central Railroad at its Monmouth station during 1952 was—\$1.

John Pudney, 44-year-old author and poet, has "caves to let". Dug 25 to 40 feet deep in sandstone quarries in Chipstead, England, about 100 years ago, the caves were equipped with water and electricity as air-raid shelters in the last war.

Keio University, in Japan, has a granite monument which was erected to the memory of the departed frogs which have contributed their part to scientific research.

Butcher Irving Orling of Miami, Fla., has agreed to send his former wife five pounds of meat weekly for their two children. Judge Wayne Allen wrote the meat order into an agreement of \$15 a week for support.

In 18th century England, large mugs were made with three or four handles so that the cup could be passed from one to another, according to the Encyclopedia Britannica.

## Patterns

Her Very Favorite!

by Alice Brooks

Prettiest at the party — any little girl looks like a dream in this dress! Simple to crochet, it's petal stitch trimmed with contrast-color flower medallions.

Pattern 7241: Children's Sizes 2, 4, 6 years included. Use cotton or wool.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,  
Prairie Publishers Limited,  
60 Front Street W., Toronto.  
Be sure to write plainly your Name, Address and Pattern Number.

TEN COMPLETE PATTERNS to sew, embroider, crochet—printed in the new 1953 Alice Brooks Needlecraft Book! Plus many more patterns to send for—including ideas for gifts, home accessories, toys, fashions! Send 25 cents now!

Map makers of ancient times decorated their maps with sketches of whales and elephants to fill in the large, empty spaces of unknown areas.

## Garden Notes

For Amateur Gardeners

### MAKE YOUR OWN

Manure, well rotted or otherwise, makes the best fertilizer but it is scarce and getting scarcer. We have, however, a very good substitute in humus. This is simply the refined and garden name given to well rotted vegetable matter such as leaves, grass clippings, weeds and even clean garbage, like orange rinds, potato peelings, carrot tops, corn husks, etc. The experienced gardener never throws these in the garbage pail or incinerator. He piles them in a heap at the back of the garden behind some shrubbery. Over each new layer he spreads some fine soil. Once in a while he will fork the pile over to mix and he will wet thoroughly. The vegetable matter soon ferments and rots and the whole mixture becomes fine rich loam which is a wonderful material to dig into any type of soil and especially heavy clay or light sand. A little chemical fertilizer spread over the pile, will further enrich it. If there is no place for a humus pile one can simply bury all this refuse directly in the garden. The old gardener will not throw anything away that will rot.

### FOR A BIG SHOW

Lack of time or money are not good reasons for not having even a big show of flowers. It is amazing what one can grow with a minimum of effort and expenditure. And where the grounds are very large, as around a summer place or farm for instance, a big show is also easily possible.

The best plan, in any of these cases, is to stick to things like petunias, nasturtiums, cosmos, marigolds, zinnias and similar plants which are not only easily grown but which also will bloom steadily for weeks. With only little care at first these will practically look after themselves. It is best to have solid beds of one flower, though not necessarily the same color, for the showiest results. A long bed of petunias about three feet wide, will set off any driveway, and roughly circular beds of zinnias, marigolds or some of the smaller things, will make a wonderful show. Then for the smaller garden there are all sorts of tiny flowers, like alyssum, portulaca, poppies and similar flowers which thrive even in poor soil and once well started will crowd out the weeds and go on blooming until fall.

### TOP QUALITY

To have tender, crisp vegetables, they must be grown quickly, with no check. To get this quick growth they should have a little stimulating chemical fertilizer, regular cultivation, thinning if necessary and watering. And there is something else, which is most important. Every vegetable comes to a stage when it is at the peak of its quality, and then passes beyond. With some things like green beans, peas and corn, this peak is over in a few days. One day the vegetables are crisp, tender and sweet. A few days later they begin to get tough. If one plants all the seed at the same time and of the same variety, then that peak is over in a very short time for all. Even with slower maturing things like carrots, beets and cabbage, the same rule holds true though these things will be high class eating for several weeks. To spread out the harvest we simply spread out the sowings at least two weeks apart from the first thing in the spring until late June or even July in some parts of Canada. We can spread the season still further by using early and late maturing varieties.

### SAFETY PROGRAM CUTS WINNIPEG ACCIDENT RATE

Driver improvement clinics and stricter enforcement of traffic regulations continued to pay off in Winnipeg during 1952 in a further decrease in the number of accidents

on the city's streets. Total number of accidents declined to 4,596 from 4,797 in 1951 and 5,528 in 1950.

In the rest of the province, where the safe driving campaign has not yet been put into operation, traffic accidents increased to 5,658 from 4,946 in 1951 and 5,006 in 1950.

### X-X OUR CROSSWORD PUZZLE X-X

#### HORIZONTAL

- Head covering
- Period of time (pl.)
- Small bed
- Wing
- Climbing plant
- Russian sea
- Cautioned
- Equality
- Child for father
- Scotch for John
- To increase in strength
- Par of fish
- A rabbit
- Nothing
- Poem
- Merriment
- Parcel of land
- Symbol for sodium
- Songs
- Printer's measure
- Measure of length
- Unit of energy
- Length measure of Tripoli
- To stupefy
- Form of "to be"
- To throw
- Embrace
- Public vehicle
- To prohibit
- Upon
- To treat
- Sign of Zodiac
- Kind of tree
- Russian mountain range
- Before
- To sever
- To estimate
- To expire

#### VERTICAL

- Prepare leather
- Wing
- Member of armed forces
- Level
- To free of
- Article
- Part of flower
- Vehicle
- Correlative of either
- Tapestry
- Road
- Negative vote
- Chopping implement
- Hibernates
- To persecute
- Room in a harem
- Hard-shelled fruit
- Genus of cattle
- Wooden pin
- Part of leg
- To put on
- Anger
- Bitter veich
- A "ull finish
- Floor covering
- Moved to
- Store
- Kind of garment
- Forewarn
- Metal container
- To exist

### PRISCILLA'S POP—Good Old Gramps

—By Al Vermeer

# Yukon Abounds In Wide Selection of Wild Game

(By Jim Peacock, CP Staff Writer)

To hear the Whitehorse Board of Trade tell it, the Yukon is one of North America's finest hunting and fishing lands. The record 76 1/2-inch horn spread of the moose head destined for the Historical Society Museum at the Yukon capital lends emphasis to this claim.

The fact is the Yukon is brimful of almost virgin hunting grounds. Its forested, mountainous terrain offers a wide selection of big game and it is believed its laws allow a greater take than any other part of Canada.

The Yukon is noted for its dall, stone and fannin sheep, caribou, mountain goat, moose, grizzly and black and brown bear. Non-resident Canadian hunters are allowed one each of mountain sheep, mountain goat, caribou and moose and one grizzly, all on a \$100 licence for the big game season from Aug. 1 to Nov. 30.

Besides, a special bear-hunting season from May 1 to June 30 allows a non-resident Canadian two grizzlies and two black or brown bears on a \$25 licence. Licence fees to non-resident aliens are \$150 and \$50.

No trophy tax is charged, but Yukon game regulations state a big game hunter from the 'outside' must hire a recognized guide. One apparent reason for this is the fact the average hunter wouldn't likely know what to do if he sighted a herd of 100,000 caribou.

(Them Kyar, director of fish and game for the Yukon, said recently that one herd of migratory caribou seen last summer was estimated to number 100,000 animals.)

Territorial agent G. R. Bidlake of Whitehorse says an average of 75 big game hunters visit the territory annually.

Whitehorse is the taking off point for Yukon hunting. Some grounds are easily accessible via the Alaska Highway. Others, where the hunting is best, are reached by horse, plane and truck.

Sport fishermen will find the Yukon's unnumbered streams and lakes all but running over with rainbow trout, Arctic grayling, northern pike and other fish. Like big game, the Yukon offers a large variety and its angling laws allow a big catch.

Grayling are numerous in practically all Yukon streams; lake trout up to 40 pounds, pike whitefish and inconnu in the Yukon river; and rainbow trout in the Kathleen lakes along the Haines road. These fish, salmon trout, pickerel, goldeye and others, are found throughout the Yukon, but the places mentioned are popular angling spots because they are easily reached from Whitehorse.

The Kathleen lakes are about 80 miles northwest of Whitehorse over fine roads. The Yukon river runs through the city and streams and lakes where grayling are plentiful abound along the Alaska Highway.

Standard gear is ample to take the possession quota of 20 fish. Seasons are long, for instance that on lake trout from Dec. 1 to Sept. 14

inclusive. Summer temperatures in the 60-to-70 range are warm enough for tent camping beside the angler's favorite hole.

And Yukon fishing licences cost only \$2 for the non-resident, Canadian or alien.

Among the Yukon's bird population are many types of grouse—blue, ruffed, spruce, Franklin and sharp-tail—rock and willow ptarmigan geese, brant and ducks.

In this case also, the Yukon offers variety and generosity in bag limit. During the season which runs from Sept. 1 to Oct. 31, a hunter is allowed 100 ducks, seven in one day. He can shoot 25 geese in a season, five in a day.

## World Happenings Briefly Told

Black toothpaste is expected to be on sale in London shops this autumn. It has been recommended by dental authorities in Copenhagen, capital of Denmark.

First of its kind in South Africa, a modern cancer clinic has been opened at Capetown. The clinic, equipped with the latest equipment from Europe and America, was built by voluntary contributions.

Eggs have come off the ration in Britain for the first time in 12 years. The Poultry Association celebrated by sending a dozen new-laid eggs to Prime Minister Churchill and the food and agriculture ministers.

A new \$44,000 curling rink at Swan River in northwestern Manitoba was destroyed by fire recently. The rink, built last summer by volunteers, housed six sheets of ice. Curlers had just completed their first season at the rink.

British industries will increase their display space by 50 per cent. at the Canadian international trade fair in Toronto June 1 to 12, Campbell Millar of Winnipeg, special United Kingdom representative for the Pacific region, said.

A drug now being tested in Pretoria, South Africa, may prove a "wonder cure" for leprosy. The drug, para amino salicylic acid, was praised by Lieut. Jack Millar of the United States Navy, attached to the American Leprosy Foundation.

Argentina will have to get along with "considerably less" meat this year, farm experts said. Cattle herds are far below the 1949 peak of 42,000,000 head, according to the authoritative journal "Review of The River Plate".

A flying X-ray team will leave Edmonton soon to launch a summer-long search for tuberculosis victims among the Eskimos of the Western Canada Arctic. The Department of Health announced that the group would be headed by Dr. L. Christensen, Indian Health Service doctor at Aklavik, N.W.T.

## TRY AND STOP ME!

By BENNETT CLEIF

A young miss was wildly in love with a pilot in Korea and mooned about him so that her poor parents were beside themselves. "He may be able to fly a jet," grumbled the father, "but judging by the excerpts you've read us from his letters he's the mushiest sap who ever came down the pike." "But, Papa," protested the daughter, "listen to this one and maybe you'll change your mind; Last night as I lay in my bunk, your dear face suddenly appeared before me. When I saw those luminous, trusting eyes, and your luscious, soft lips, I vowed that I would be worthy of your love. The air suddenly seemed purer and a beam of moonlight pierced the clouds and shone on my pillow. . . . 'Stop!' roared Father. 'That's the worst drool yet!' The daughter calmly handed the letter to her mother. 'It was so nice of you to let me read what Papa sent you while he was fighting in World War I.'

Basic rules of arithmetic, algebra and geometry were known to scholars of more than 4,000 years ago.

—Central Press Canadian.

A WELCOME HAND FOR MONTY—Field Marshal Viscount Montgomery, deputy supreme commander of NATO forces in Europe, is shown, (left), as he was greeted by General J. Lawton Collins, U.S. army chief of staff, on his air arrival in Washington for a month's visit in the U.S. and Canada. In background is Lieut.-General Laurence S. Kuter, USAF, deputy chief of staff for personnel. While in Washington, the British commander will be a guest of President Eisenhower, with whom he will confer, along with other government officials, on military matters.

(By Francis James)

## GLORIOUS SPRING

What a great joy it is to see the sun shining with warmth and brilliance in the early spring. Our spirits soar, hearts are happy as we feel the approach of the growing season. Soon we'll have the small buds appearing and birds returning from the south. This all sounds terribly prosaic but we think everyone feels a simple sincere thrill at the prospect of the awakening season.

The one cloud to dim the fullest enjoyment of spring is that it's housecleaning time. But there again most of us are pleased when the weather is fine enough to get things out on the line, to air, clean, dust and wash those things long closed up during cold winter months. Seems to be a bit of an instinct with homemakers to start cleaning just as soon as the air is warm and the sun is bright and the days begin to lengthen out.

Housecleaning is not the complete upheaval that it was 20 years ago but even today it is necessary. For this is the season when those little winged creatures go to rest in a slightly soiled area of a woollen garment. So what better or more logical time to route them out, clean or wash all woollens and put them away for the spring and summer months. When putting away winter gar-

ments and bringing out your summer wardrobe is a natural time for cleaning out cupboards and drawers. They should be well dusted, washed and sprayed. It's a good opportunity to put fresh lining in cupboards and drawers. A couple of rolls of wallpaper will result in a clean odourless cupboard. If you use the new chlorophyl adhesive for the paper you'll feel the cupboard is even cleaner. Line drawers and recover hat boxes, waste paper basket, kleenex box, etc., with a bright new design in wallpaper.

After these little housecleaning chores are completed the homemaker can, with a free conscience, enjoy the joys and beauties of spring.

## FARMER HAS REASON FOR WEARING SUSPENDERS

CASTELFRANCO, Veneto, Italy.—A 34-year-old farmer, Antonio Sartoretto, says he's going to wear suspenders for the rest of his life.

Why? He fell from a barn window and his loose suspenders caught on a window hook. They held him dangling 30 feet off the ground until relatives rescued him.

There are approximately 1,000 languages and dialects spoken today.

## On The Side : E. V. Durling

Hardy Horses

A sportscribe says that carrying 142 pounds in a race is injurious to a thoroughbred. Nonsense. It is only injurious to his chances of winning if he is carrying 15 more pounds than some of the other horses. Physically it is harmless. As for what weight a horse can carry, consider the horses competing in the Liverpool Grand National Steeplechase. The top weight horse carries 175 pounds! And that for a distance of 4 1/2 miles over jumps.

## Profile of a Pitcher

Satchel Paige is one of the most picturesque major leaguers. The St. Louis Browns' hurler is undoubtedly one of the greatest pitchers of all time. Guesses as to Satchel's age vary from 45 to 60. Be that as it may, Paige worked in 46 ball games last year. Not many younger twirlers can say the same. Satchel, in private life, is a very proud papa of four children. Oldest is four and youngest four months.

## Feminine Fumblers

What is the speed record for a woman extracting her bus fare from her handbag? I heard of a woman who could do it in a minute and a half with only four fumbles. It also has been reported there was another woman who could regularly find her lipstick or a pencil in her handbag in less than two minutes. How many articles does the average woman carry in her handbag? A young woman of my acquaintance, discussing this question, said her handbag regularly contains the following: Compact, lipstick, comb, purse, perfume, pen, pencil, address and memo books, keys, cigarettes, lighter, charge plates and identification cards.

## Weighty Matters

That nobody loves a fat man is, of course, an erroneous claim. It is interesting to note it is usually a very small woman who is married to a man of massive proportions. The difference in weight between some husbands and wives is astonishing. For example, Alfred Hitchcock, the Hollywood film director, weighed 270 when his wife weighed only 90.

## Leave It to the Scots

Scotland has compulsory auto insurance. The way the Scots handle it is that an auto owner must have accident insurance to get a driving license. No insurance, no license. In this way the wild drivers, who are bad insurance risks, are kept off the streets and highways of Scotland.

## Three Little Words

What are the three sweetest words in the English language? In a recent contest to decide this, "I love you" was declared the winner. Second three sweetest words were voted to be "dinner is served". Third choice, "keep the change". A vote was also taken on the three saddest words. "Rest in peace" was the winner. "Not sufficient funds" was second and "out of gas" third.

## Try It and See

Write down your age at this year's birthday. Add the date of your birth. Add the date of your marriage. Add the number of years you will have been married at your wedding anniversary of this year. If the total is not 3,906 I will be surprised.

# Slavery Still Prevalent In Many Countries

UNITED NATIONS, N.Y. — A three-year survey of the United Nations shows that actual crude slavery still exists in some sections of the world, but information is incomplete and the solution is not easy.

U.N. Secretary-General Trygve Lie summed up the situation in a report calling on the U.N. Economic and Social Council to study further steps to meet the slavery problem when it meets here March 31.

In Lie's report, based on the work of a special committee which has been studying the slavery problem since 1950, Lie told the Council no satisfactory definition of slavery ever has been reached.

The world has been trying to control slavery under an international treaty framed by the League of Nations in 1926. This defines slavery as "the status or condition of a person over whom any or all of the powers attaching to the right of ownership are exercised."

The special committee reported that other forms of servitude include debt bondage, serfdom or peonage on farms, contracting out persons for hire, marriage customs where the woman is deprived of free human rights, and child transfers for payment or other conditions which exploit the child.

The special committee divided up the world for the survey, each making an intensive study of his area. It got the U.N. to send questionnaires to all countries to get further data.

Nine U.N. members and seven non-members did not answer requests for government information. Lie listed them as Cuba, Haiti, Liberia, Nicaragua, Paraguay, Poland, Saudi Arabia, the Ukraine and Yemen, all U.N. members; and Albania, Andorra, the sultanate of Muscat and Oman, Portugal, Romania, San Marino and Spain.

The Ukraine answered only by calling attention to a Soviet Union reply that "the problem of slavery . . . does not arise in the Soviet Union."

The slave labor inquiry did not apply to the question of forced labor and labor camps. That was taken up by another Assembly committee after charges that millions of subjected peoples were used as slave labor by the Soviet Union.

Both Lie and the special committee agreed that some government information received differed sharply from information gathered from private sources.

Lie told the Economic and Social Council that it appeared further study is necessary to find out just how much and what kind of servitude still exists, before measures to stamp it out be considered.

Lie said he opposed a new treaty to replace the 1926 convention but proposed new clauses be framed to cover new definitions of slavery. Countries which ratified the old convention would be called on to ratify only the new clauses.

## GEMS OF THOUGHT

### PLAIN-DEALING

Plain-dealing is a jewel.—William Wycherly.

Come give us your plain dealing fellows

Who never from honesty shrink.

—Anonymous.

Plain dealing is the best when all is done.—William Prynn.

Be honest, be true to thyself, and true to others; then it follows thou wilt be strong in God, the eternal good.—Mary Baker Eddy.

These find withal who have such courses run, That generous plainness proves the better way.

—William Alexander.

Nothing astonishes men so much as common sense and plain dealing.

—Ralph Waldo Emerson.

### CAT MOTHERS PUPPIES

WINNIPEG.—Three of six puppies born to "Brenda", miniature pinscher, died and the mother was too weak to feed the others. A call for help resulted in a mother cat being brought with her kittens. The puppies mingled contentedly with the kittens.

A gallon of milk in the United States weighs about 8.6 pounds while a Canadian gallon weighs about 10.3 pounds.

## STANDARD BRIDGE

Bidding: duplicate is largely influenced by the vulnerability conditions and both West players chose to open on this deal from the recent Camrose Cup match between England and Northern Ireland.

The Irish West's semi-psyche One Heart was doubted by North and redoubled by East. South's One Spade was raised to Four, and a sacrifice bid of Five Hearts was doubled and two down.

In Room 2 the English West made things more difficult by opening with Three Hearts. North decided against a conventional overcall to force a suit call from South, as a Club response might lead to trouble. Three Spades was inadequate, so he jumped to Four. East bid Five Hearts and South Five Spades, which had to go one down.

### SPARKPLUGS

Sparkplugs should be "regapped" whenever they go out of adjustment, or after every 5,000 miles of driving use. They should be changed when the electrodes or the insulators are found to be defective.

## OUR COMPLETE SHORT STORY—

## THE LILAC TREE

Mary Said, "I Don't Want  
To Settle Down and Be a  
Farmer's Wife".

By RUTH THOMPSON

VIC strode ahead into the depot with his suitcase and Mary's bag. Last night this had seemed a perfect idea. Vic and she were dancing when he suggested it.

"We can be married right away over the line. Don't fuss about clothes," he had said. "Just wait. I'll dress you like a doll."

When he said that, Mary felt tingly from head to toe. She hated her job in the noisy restaurant. Every day the trays seemed heavier and clumsier to manage. Vic's cheery flirting at the counter had been a welcome diversion.

Vic set the bags down and she watched him hurry to the ticket-window. How queer, she thought, just two years ago, when she left Pine Creek—it was April then, too—she had entered the city through this same station. Two years of disillusionment! She could still see her mother's tear-filled eyes.

"Aw, mom, you know I love you," Mary had said. "You're swell, Roger, too. But I don't want to settle down and be a farmer's wife. I want to have fun."

Then the local train puffed in and her mother had held her tightly.

"Don't worry about me, Mom. I'll write."

Her mother had tucked a spray of purple lilac in the strap of the suitcase—"So you'll not be forgetting the lilac tree."

Mary smiled. She was remembering how she had called even the tiniest shrub a lilac tree. Someone came and sat close to her. Vic, it

was, with the tickets. "What are you grinning about?" he asked. "Oh, nothing," she answered. "I was just remembering." She wouldn't try to explain. He would never understand.

He let it go at that. He laid his arm across her shoulders, drew her close, while his pudgy fingers kept squeezing her arm. His lips almost touched hers.

"Kiss me, Baby," he urged with a possessive glint in his steel-blue eyes. Mary shrank back. Strange that never before had she realized the fullness of his lips. She pushed him back with a sense of uneasiness—why, this was the man she had promised to marry.

"Not afraid of me, are you? Better not be!" His voice sounded sarcastic—or was that a threat?

Mary turned her face away. She noticed a woman who had entered the depot, carrying an armful of lilacs. As she passed, a spray fell near Mary. She reached and picked it up.

"Just wait and you'll have a roomful of roses," said Vic.

Mary did not answer. She was seeing lilac-trees, purple and white, all in bloom back home. She could smell their sweetness.

Vic swore under his breath. Startled, Mary turned. A swarthy man, with hat pulled low, was approaching them. His face was vaguely familiar.

"Who is he, Vic?" Mary whispered. She tried to remember where she'd seen him. Vic paid no attention to her. Instead he spoke sharply to the man.

"What's the idea, following me here? Didn't I tell everyone to lay low?"

Mary caught a glimpse of a scar on the stranger's cheek. Something clicked. That picture in last night's paper. The story about another hold-up.

Then—"It's like this, boss—" He was whispering something in Vic's ear. Boss!

Vic swore again. His voice was harsh. "No!" he exclaimed.

Mary shivered. She looked around, hoping no one heard him.

"Listen, Baby," he said, turning to her. "I've got some business, some mighty important business to tend to. Wait here."

Mary watched them step into a large flashy car. At first she was frightened. Then there was no feeling in her body but a queer numbness. Only her brain stirred. It was clearing, like a mist rising after sunrise.

She thought of Vic's promises. Beautiful clothes, night clubs, a gay party somewhere every night. She thought of her mother and of Roger. Was he still waiting for her in Pine Creek?

She went to the door and looked down the street. Vic might be back any minute now.

Suddenly she grabbed up her bag and ran to the ticket window. Breathlessly she asked the agent about the train to Pine Creek.

"Yes, Ma'am! In three minutes, better hurry," he said as he stamped her ticket.

Clutching the paper, she felt as if she had been running through a dark, dense forest and had that minute stepped out into the warm, clean sunlight.

## Wild Geese Make Desperate Effort To Help Injured Goose

GREENWICH, Conn.—A desperate effort by two Canadian wild geese to try to help a fellow goose with a broken wing rise off the water was witnessed here by at least four persons. The two geese swam alongside the cripple and thrashed their wings wildly in an attempt to lift her so she could join in a flight north. They didn't succeed.

The wounded goose still swims about here, fed by shore residents.

Capt. Amos L. Horst, executive secretary of the Wildlife Restoration Foundation, which maintains a Greenwich game preserve, witnessed the gallant attempt.

He said he had heard of game birds attempting to help their fellows but had never seen an example before.

More than 100 geese flew into a Greenwich cove off Long Island Sound last December and began migrating northward in traditional V formation. About 30 to 40 left each day.

Horst and three friends were watching them.

"We noticed when the last flock had taken off that one goose had been left behind on the water," Horst said.

"By its futile efforts to rise, we perceived that one wing had been broken during the winter. Perhaps it had been shot, off the preserve, or been caught in a trap, or been struck by a stone thrown by a boy."

"As we watched, two geese from the flock overhead returned to the wounded bird. They swam close on either side of the cripple, and then all three skittered across the surface of the water, the two helpers beating their wings strongly in an effort to lift the disabled one between them."

"This manoeuvre was tried twice, but a goose weighs 15 pounds or more, and it failed. Then the two helpers honked farewell and flew away."

The wounded goose now swims to shore every morning to get a bread ration.

A SADDENED sports world mourns the passing of Jim Thorpe, the greatest athlete who ever lived in the opinion of many. The Sac and Fox Indian died in his trailer home March 28th of a heart attack. He was 64 years old.

## Canadian Wheat Supplies Higher

OTTAWA.—Visible supplies of Canadian wheat in store or in transit in North America on March 19 totalled 274,663,000 bushels, the Bureau of Statistics said.

This was 29 per cent. more than the corresponding total last year.

The bureau said farmers' marketing of wheat totalled 9,303,000 bushels during the week as against 4,684,000 bushels a year earlier. The aggregate for the crop year so far amounted to 336,285,000 bushels compared with 285,739,000 bushels in the similar period of 1951-52.

## FALSE TEETH That Loosen Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plate dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little FASTEETH, the alkaline (non-acid) powder, on your plates. Holds false teeth more firmly, so they feel more comfortable. Does not sour. Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

## Fashions

## Pinafore 'n' Jacket

4543 SIZES 2-10

by Anne Adams

Young charmer! That pretty petticoat look spiced with scallops. And a jacket to match—so grownup, just like mom's own sun-sembles! In a combination of two colors or plaid 'n' plain, this is daughter's favorite dress from Spring right on through summer.

Pattern 4543: Children's Sizes 2, 4, 6, 8, 10. Size 6 takes 1½ yards 35-inch print; 1½ yards plain.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,  
Prairie Publishers Limited,  
60 Front Street W., Toronto.

MACDONALD'S  
**BRIER**  
Canada's Standard Smoke

Delicious  
**INGERSOLL**  
Cheese

...the ideal centerpiece  
for your "Party Spread"!

Your whole family will love this delicious blend of fine Canadian cheddar. Ingersoll Baby Roll Cheese is smooth and mild with just enough tang to make it a special favorite with the menfolk. Adds grand flavor to snacks, apple pie and hot cheese dishes. Ideal size for sandwich slices, too.

Be sure you get genuine INGERSOLL Baby Roll.

INGERSOLL  
Baby Roll

Ingersoll Baby Roll is a product of over 60 years experience in making fine cheese. That's why you enjoy that extra good flavor when you ask for Ingersoll.

## Cards of Thanks

We wish to express our sincere thanks and appreciation to our many relations and friends for their kindness and sympathy and for the many floral tributes, the beautiful cards and kind letters in the passing of our husband and father, the late Gottfried Hein. Special thanks to Rev. E. Faul and Rev. Kujath also Dr. McFarlane and Mr. and Mrs. John Harsch.

Mrs. Emma Hein and Mr. and Mrs. Ray Schultz.

We wish to express our appreciation and thanks to the Carbon Missionary Society and Young Peoples Society for flowers, and friends that brought food to our home. And many thanks to the Dorcas Society and Community for the purse of money that was donated to us, due to our recent accident. Mr. & Mrs. Art Biebrick & family

## PIANOS

The Alberta Piano Co. Ltd., Calgary, Alta., offers amazing values in new and refinished pianos, all carrying our service guarantee. Prices to suit every pocketbook from \$200.00 upwards, including such makes as Kurtzman, Gulbranson, Mason & Risch, etc. Our demonstration vans will visit points in Alberta by request. A fine stock of new pianos is always available in Blond, Walnut or Mahogany.

**IMPORTED**

## ...So what?

Side by side on the merchants' shelves—Canadian materials and "imported" goods. Do you get any advantage when you go for "imported" products?

In textiles, at least, the answer is simple. Canadian mills turn out fabrics and yarns that match or better the production of any other textile country of the world in quality.

They are made by Canadians who are paid good Canadian wages; they are designed to please Canadian tastes, meet Canadian needs.

This is no plea to shun "imported" materials. They should be considered along with domestic products by every Canadian consumer, but on a strict *what-do-I-get-for-my-dollar* basis.

Ask for Canadian textiles if you want the best for your money.
